Technical Skills

- **Frontend Technologies:** React, Next.js, Tailwind CSS, Redux, React Query, Zod, React Hook Form, Responsive Design
- **Programming Languages:** JavaScript, TypeScript
- **Backend & Databases:** NodeJS, Express.js, MongoDB, PostgreSQL, GraphQL, RESTful APIs
- **Testing & Quality Assurance:** Jest, Cypress
- **DevOps & Tools:** Git, CI/CD
- **Methodologies:** Agile

Experience

Oceanwave

Feb 2024 - Present

Software Engineer

Lagos, Nigeria

- Enhanced and maintained key frontend features of an internal CRM tool with React and TypeScript, integrating RESTful APIs and ensuring responsive design for over 2,000 businesses worldwide.
- Architected a reusable UI React component library with Tailwind CSS, which accelerated development and standardized UI across multiple teams.
- Engineered a real-time data synchronization feature using WebSockets, enhancing application interactivity and user experience.
- Drove Test-Driven Development (TDD) using Jest and Cypress, establishing best practices that fostered quality and reduced post-deployment bugs.

Metchain

Feb 2023 - Jan 2024

Frontend Engineer

Dubai, UAE (Remote)

- Migrated a legacy application to a modern Next.js and TypeScript stack, improving performance, maintainability, responsive design, and developer experience.
- Optimized core application and website performance through code-splitting and advanced caching, reducing website load time from 10seconds to 3 seconds.
- Implemented a GraphQL API layer with Apollo Client and Zod validation, creating an efficient, decoupled data-fetching pattern that simplified state management.

Trusoft Limited

May 2022 - Oct 2023

Software Engineer (Frontend)

Lagos, Nigeria

- Built a core interactive map search feature using React and Mapbox GL JS, which significantly boosted user engagement by 50%
- Optimized data fetching architecture using React Query and TypeScript, reducing unnecessary re-renders and improving UI responsiveness
- Translated complex requirements into actionable tasks, collaborating with cross-functional partners and subject matter experts within an Agile team, consistently delivering high-quality, maintainable code.
- Owned and automated the frontend CI/CD pipeline, enabling more frequent and reliable feature releases.

Reboost

Dec 2021 - May 2022

Frontend Developer Intern

Beirut, Lebanon (Remote)

- Participated in cross-functional sprint planning and retrospectives within an Agile environment to prioritize features, track blockers, and refine user stories.

Education

Nnamdi Azikiwe University

Sep 2018 - Apr 2022

Bsc. Pure and Industrial Chemistry

Certification

- Google Africa Developer Training Program: May 2022
